

Job Description

Non-Graduate Trainee Health & Safety Consultants (Nationwide – Based Regionally)

We are a leading Health and Safety consultancy providing bespoke solutions to our select and valued clients across the rural sector and are excited to be expanding our consultancy team. We are seeking conscientious, adaptable and highly motivated individuals to join our team as Trainee Health & Safety consultants.

As a trainee consultant you'll shadow a qualified consultant visiting clients and working with them to design and develop their personalised H&S package, and work with our office team to gain a sound foundation. As you progress, you'll start to undertake client-facing work supported by your mentor. In your final year, you'll have your own portfolio of clients, cementing your learning and building relationships to take your career even further.

The successful applicant will be based regionally, travelling nationwide to support our clients as part of a larger consultancy team whilst reporting to our office in Witney, Oxfordshire.

All training will be delivered through a structured development programme whilst you learn practical skills out in the field shadowing consultants and learning the day to day ropes of risk management in a wide range of agricultural environments and rural settings.

The ideal candidate will be adaptable and pragmatic with a keen interest in helping people operate safely and influencing positive behaviours. Trainees will be fully supported by experienced mentors and colleagues, immersed in an exciting and varied job role and will spend their working time in an environment they love.

Candidates can expect an excellent trainee package starting at £19,000. Benefits include company car, healthcare, pension and bonus schemes. Trainees will receive support and funding for industry recognised NEBOSH accredited qualifications relevant to their role.

The ability to work to a planned schedule and commitment to effecting change is essential. You must be numerate and a great communicator, verbally and in writing. You'll be flexible, you'll enjoy driving and you'll be prepared for some early starts and long days.

If you want to build a rewarding career influencing culture and improving wellbeing in some of the country's leading farms and rural estates, great career prospects await you.

Full UK driving licence is required.

To apply in confidence please submit a CV with cover letter to Sophie Walker at s.walker@safetyrevolution.co.uk. Please use your cover letter to answer one of the following questions. Answers should be a maximum of 500 words.

1. Describe a project or change you have initiated, how you did it and what the outcome was.
2. Describe how you have helped support or improve the wellbeing of a friend or colleague.
3. Describe an initially negative experience that ended with a positive outcome.
